

A Shaky Foundation

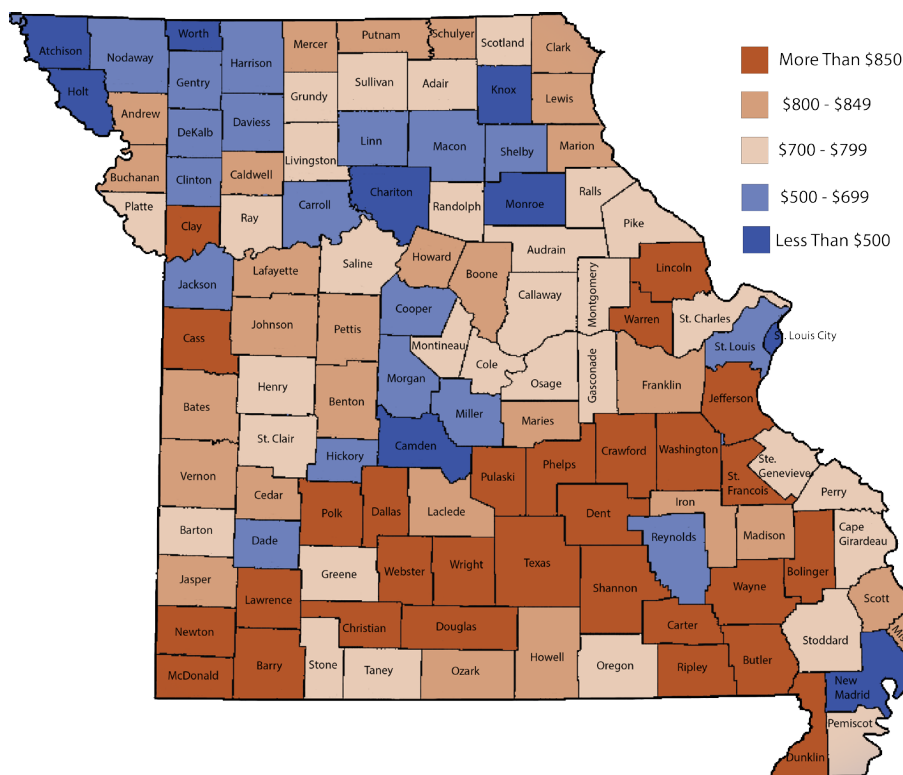

Missouri Underfunding the School Formula

Fiscal Year 2014: 2013-2014 School Year

Missouri is failing to invest properly in schools in every region of the state, undermining our state's commitment to prosperity and opportunity by shortchanging students in every corner of the state. An analysis of required K-12 school funding levels in Missouri shows that Missouri is underfunding its K-12 schools by \$656 million statewide, nearly 20 percent below the required level. Very few parts of the state have been spared with nearly every county in Missouri having at least one school district that is \$700 or more short of the required funding level per student.¹

On a per student basis, the shortfall is about \$700 if applied equally throughout the state. Yet, actual shortfalls vary widely between counties, and even between school districts in the same county. So although the shortfall in funding is hurting counties throughout the state, it tends to be worse in rural areas compared to schools within Missouri's large cities of Kansas City and St. Louis.

In 1 of 2 counties, schools are underfunded by an average of \$800 or more per student

Shaping Policy...
Creating Opportunities

Key Findings on Counties:

- As shown in the map, schools in 57 of Missouri's 115 counties, nearly one out of every two counties in the state, are underfunded by an average of \$800/student or more.
- County shortfalls average from a low of \$199/student in Camden County to a high of \$967/student in Pulaski County.
- Schools in 106 of Missouri's 115 counties (including the city of St. Louis) are underfunded by the foundation formula standard an average of \$500 or more per student this year.
- 31 counties, more than one of every four, have at least one school district that is underfunded by \$900 or more per student this year.²

Key Findings on School Districts:

County averages can mask the impact of the underfunded formula throughout the state. Evaluating the district level impact shows that even larger levels of underfunding per district is more prevalent than not.

The data indicate that:

- **Nearly 2 out of every 3 of Missouri's school districts are underfunded by \$800 or more per student in the current year (304 of 520 school districts).**
- While only 15 school districts (3 percent) are underfunded by \$100 or less per student, 72 (14 percent, or one of every seven districts) are underfunded by more than \$900 per student.

¹Only five counties (Holt, Knox, Nodaway, Worth and St. Louis City) do not contain a district that is underfunded by \$700 per student or more.

²These include the counties of Barry, Bates, Boone, Caldwell, Cass, Christian, Clay, Clinton, Douglas, Franklin, Greene, Iron, Jackson, Jasper, Jefferson, Lincoln, Newton, Ozark, Pettis, Polk, Pulaski, Ray, Ripley, St. Charles, Stone, Sullivan, Texas, Warren, Washington, Webster and Wright.

Foundation Formula Intended to Ensure Adequate Funding to Meet Educational Standards

Missouri’s “foundation formula” was adopted by state lawmakers in 2005. Based on a per-student level of funding, the standard was meant to ensure that each school district in the state had adequate funding to meet educational standards, regardless of the district’s ability to generate local revenue from property taxes and other sources.

The formula was designed to be implemented over a number of years and be fully operational by 2013. However, since 2010, due to a drop in revenue brought on by the Great Recession, funding for the formula has fallen below its required levels every year. Funding for the foundation formula is currently \$3.075 billion, and 35 percent of Missouri’s general revenue fund is dedicated to K-12 education.

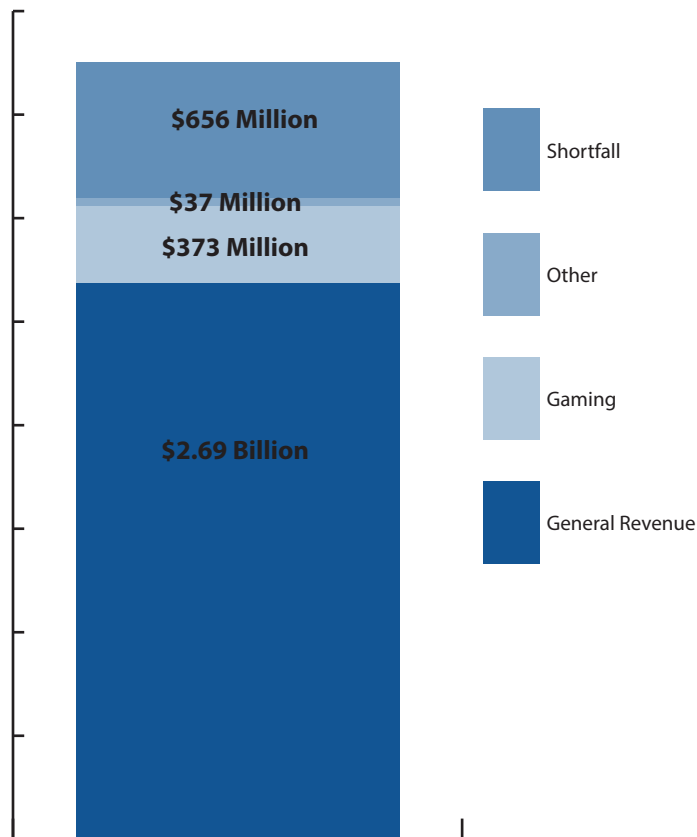

Even still, funding for the formula in the current year is \$656 million, or about 17 percent, below its required level (2013-2014 School Year, State Fiscal Year 2014). Translated into a per-student rate, Missouri is underfunding the formula by as much as \$978 per student in some school districts.

A more comprehensive explanation of the state’s K-12 funding formula is included in Appendix A.

Methodology

Working with the Department of Elementary & Secondary Education, the Missouri Budget Project applied the precise foundation formula requirements to each of Missouri’s 520 school districts and then compared that intended level of funding with actual current funding. Through this analysis, the Missouri Budget Project determined how much the state is shortchanging each district. Comprehensive data on each school district is included in Appendix C of this report.

Missouri School Funding Formula Faces \$650 Million Shortfall

Results Show Significant Disparity Between School Districts, Even Within Same County

The amount that school districts are underfunded can vary dramatically from district to district, even when school districts are located in the same county. This disparity between districts in shortfall amounts is due to the factors included in the formula’s calculation. One factor is the ability of the district to secure local taxes. This factor, referred to as the “Local Tax Effort,” assesses the “ability to pay” at the local level through a combination of property wealth and other measures. State aid to local districts is then inversely adjusted by this factor, requiring relatively wealthy areas to finance a greater share of local education expenses.

The county with the lowest level of underfunding is **Camden**, at \$199 on average per student. However, there is significant disparity between the school districts in that county, demonstrating that the county average shortfall may not provide a full picture of funding needs. While the Camdenton R-III school district is underfunded by just \$74 per student, the Stoutland R-II school district is underfunded by \$871 per student, one of the highest levels of underfunding in the state.

Camden County	
School District	Shortfall Per Student
STOUTLAND R-II	\$871
CAMDENTON R-III	\$74
CLIMAX SPRINGS R-IV	\$79
MACKS CREEK R-V	\$819
Camden County	\$199

One of the clearest pictures of the disparity that can exist between funding levels of particular school districts within the same county is perhaps **St. Louis County**. The county average of underfunding is \$512 per student. However, while the Bayless School District is underfunded by \$876/student (one of the highest levels of underfunding in the entire state) the Clayton School District is underfunded by just \$34 per student, one of the lowest levels statewide.

St. Louis County	
School District	Shortfall Per Student
HAZELWOOD	\$854
FERGUSON-FLOISSANT R-II	\$800
PATTONVILLE	\$56
ROCKWOOD R-VI	\$747
KIRKWOOD R-VII	\$38
LINDBERGH	\$43
MEHLVILLE R-IX	\$738
PARKWAY C-2	\$38
AFFTON 101	\$724
BAYLESS	\$876
BRENTWOOD	\$36

RIVERVIEW GARDENS	\$455
UNIVERSITY CITY	\$151
VALLEY PARK	\$714
WEBSTER GRVES	\$730
SPECL. SCH. DST.	\$466
St. Louis County	\$512

Similarly, **Jackson County** has a wide spread between its school districts. Although Grain Valley R-V schools are underfunded by \$957 per student, the Center 58 School District is underfunded by an amount equaling \$112 per student.

Jackson County	
School District	Shortfall Per Student
FORT OSAGE R-I	\$626
BLUE SPRINGS R-IV	\$869
GRAIN VALLEY R-V	\$957
OAK GROVE R-VI	\$923
LEE'S SUMMIT R-VII	\$878

LONE JACK C-6	\$903
INDEPENDENCE 30	\$946
KANSAS CITY 33	\$270
CENTER 58	\$112
Jackson County	\$653

In some counties, however, the average amount of underfunding is consistently indicative of funding needs in schools throughout the county. For example, **Pulaski County** has the highest level of underfunding, averaging \$967 per student. The six school districts within Pulaski County range from being underfunded by \$940 - \$975 per student, or fairly close to the county average.

Pulaski County	
School District	Shortfall Per Student
SWEDEBORG R-III	\$949
RICHLAND R-IV	\$952
LAQUEY R-V	\$970
WAYNESVILLE R-VI	\$975
DIXON R-I	\$940
CROCKER R-II	\$959
Pulaski County	\$967

Conclusion

The vast majority of school districts throughout Missouri have been significantly hurt by Missouri's inability to fully fund the state's education funding formula, which is key to our kids receiving the world-class education they need to compete in today's global economy. Missouri can't afford to further erode its tax base with tax cuts that will make it even harder to invest in Missouri schools.

APPENDIX A

The Missouri School Foundation Funding Formula

The foundation formula is designed to ensure that all school districts throughout the state are able to spend an adequate amount on each student, regardless of wealth and revenue-generating capacity found in each district. The payment made by the state to each school district is based upon the following factors:

- **Weighted Average Daily Attendance:** This factor measures attendance in each district and allows for state aid to be higher to accommodate students who are more expensive to educate, such as low-income students, students with Individual Educational Programs, and Limited English Speaking students.
- **State Adequacy Target:** This is the minimum amount that the state has determined will be spent per student in all districts, and it is adjusted every two years. The Fiscal Year 2014 target is \$6,716 per student, but due to budgetary constraints, it has been lowered to \$6,131.
- **Dollar Value Multiplier (DVM):** In relatively high wage areas of the state, school districts need to be able to pay higher salaries to attract teachers and other personnel, and the dollar value multiplier factors this into the formula by adjusting state aid to account for differences in economic conditions around the state. The multiplier is positive in regions of the state where the wage per job is above the median county wage across all counties and metropolitan areas of Missouri. The current DVM ranges from 1.000 to 1.089.
- **Local Tax Effort:** This factor assesses the “ability to pay” at the local level. The calculation looks at local property wealth, state-assessed utility property taxable wealth, revenues from the “Financial Institutions” tax, and other local tax sources. State aid to local districts is then inversely adjusted by this factor as relatively wealthy areas are required to finance a greater share of local education expenses.
- **Hold Harmless Provisions:** In view of the fact that in many districts, changes in the above factors could lead to declining state support, the foundation formula contains so-called “Hold Harmless” adjustment provisions. The purpose of these are intended to ensure that each district maintains the level of state aid (adjusted by the Dollar Value Multiplier) that it received in FY 2006 (or FY 2005, whichever is greater for larger districts) when the formula was last changed.
